What Our Students Say About Lime Digital

Real Stories, Real Success

I joined to learn digital marketing. I ended up building a business. I now run Dhritiva. Exporting incense sticks and essential oils. I didn't have a business plan. I had a product and a skill I learned in this classroom. That was enough to start.

Patel Drashti
Founder - Dhritiva

I run an agrichem company. Nobody thought we belonged on social media not even me. But I joined Lime Digital anyway. And Paras Sir said something that changed everything: Don't sell your product. Solve your farmer's problem. We rebuilt Polygen's entire digital presence around that one idea.

Vedang Pedhadiya
Co Founder - Polygen

I do a full time job. My only free window was 8AM to 9AM. Most institutes would have said not possible.' Paras Sir built a batch around people like me. In that one hour every morning, I got more real business insight than I expected branding, positioning, how to actually launch. Rivanta Naturals didn't exist before this course. Now it does.

Prapati Jignesh
Founder - Rivanta

**Every expert was once a beginner
who decided to begin.**

Director
Lime Digital Institute

I remember the day I decided to start this institute. I had spent years working in the industry, watching talented people struggle not because they lacked potential, but because no one had ever shown them the right path. That one thought changed everything. Lime Digital Institute was born from that moment.

If you're thinking about your career in digital marketing, here's what I want you to know. You don't need to be a tech genius. You don't need a corporate background. You need a place that teaches you the real things how campaigns actually work, how businesses grow online, and how to apply it from day one. That's exactly what we do here.
